

(b) The lion population has grown from 239 in May, 1985 to 304 in May, 1995.

(c) and (d) An area of 1412.12 sq. km. of the Gir forest which is the habitat of lions, has been constituted into a protected area under the provisions of the Wildlife (Protection) Act, 1972. The Asiatic Lion is fully protected against hunting and commercial exploitation. Habitat protection and management activities such as habitat improvement, water conservation, wildlife health monitoring etc., are also undertaken. Under in situ conditions, breeding takes place if favourable conditions are available to the lions. No artificial breeding programme is necessary. As a result of these measures, the population of Asiatic Lions has gradually increased from 177 in 1968 to 304 in 1995.

(e) and (f) Yes, Sir. After detailed scientific investigations the Kuno-Palpur sanctuary in Madhya Pradesh was selected for establishing a second free-ranging population of the Asiatic lion. The project will be implemented over a 8-10 year period. At present in the first phase, preliminary habitat and prey base development and eco-development works are being undertaken and actual shifting of some lions will take place in the second phase, which will start around the year 2000.
